

MORNINGSTAR'S INVESTMENT PROCESS

1 In-Depth Valuation Analysis

We analyze capital markets with a valuation lens to find ways we can get more than we'll pay for, and gauge market sentiment to help ensure we're taking a contrarian look at markets.

2 Develop Asset Class Views

Our asset allocation best thinking stems from valuation-based opportunities in stock and bond markets, as we seek to maximize return for a given level of risk.

3 Investment Selection

Our manager research team meets personally with managers to evaluate their investment styles using a five-pillar system to identify the most appropriate strategies to include in our portfolios.

4 Portfolio Construction

When building portfolios, we look at the whole picture. Considering risk and return characteristics of investments may adjust our asset class thinking as we bring pieces together into a portfolio.

5 Ongoing Monitoring/Adjusting

As markets change, so do our portfolios. Our investment team monitors them each day to stay well-positioned and risk-aware through the market's ups and downs.

1 In-Depth Valuation Analysis

Morningstar's Valuation-Driven Asset Allocation:

- Starts with research
- Based on 40 years of researching the fundamental drivers of asset class returns
- In-depth valuation analysis of:
 - 200 equity markets
 - 150 bond sectors
 - 37 currencies
 - Alternative asset class: infrastructure/real estate

Valuation Process:

- Calculating a forward-looking 10-year valuation implied return
- Comparing against historical ranges looking for potential over/undervalued asset classes
- Review of investor sentiment looking at market views of an asset class

Morningstar's Asset Class Valuation Framework

VALUATION-IMPLIED RETURN	=	CASH FLOW YIELD	+	CASH FLOW GROWTH	+	CHANGE IN VALUATION
EQUITY		Dividends Buybacks		FCF Growth Earnings Growth		Price/Fair Value P/CF, P/E
PROPERTY		Rent		Income Growth		Price/NTA
BONDS		Coupons Interest		Defaults		Yield Spread
CURRENCY		Interest Rate Differential		Inflation		Real FX Rate

2 Develop Asset Class Views

Monthly Group meetings to identify asset classes with potential to maximize returns for a given level:

- Review valuations
- Analyze investor sentiment
- Draws on Morningstar's global asset class teams and draws on equity and credit analysts

Employs Morningstar's Valuation-Driven Asset Allocation:

- Starts with neutral asset mix for each portfolio
- Sets long-term risk and return parameters
- Over/underweights certain asset classes relative to neutral asset mix based on assessment of valuations

Morningstar's Global Asset Class Monthly Update

3 Investment Selection

Morningstar looks for managers that fit well together in a portfolio:

- Comparing:
 - Nuances of different styles
 - Managerial track records

120+ research team meet regularly with managers and utilize the Morningstar five-pillar process

Morningstar's Five-Pillar Manager Evaluation System

People	Process	Parent	Performance	Price
Team Quality /Experience	Security Selection/ Idea Generation	Structure/Ownership	Rolling Risk-Adjusted Returns vs. Style Benchmark	Expenses
Team Depth	Valuation Discipline	Organization Stability/ Financial Strength	Downside Statistics	Attribution
Team Continuity	Portfolio Construction/ Risk Management	Culture/Stewardship		
Alignment of Interests	Capacity	Regulatory/Compliance		

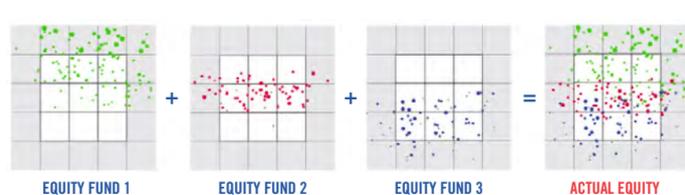

4 Portfolio Construction

Uses mutual and pooled funds with ETFs to hit asset allocation targets.

Morningstar goes beyond simple objective/returns-based analysis:

- Reduces holdings overlap
- Combines top managers whose holdings complement each other

Morningstar's Holdings-Based Analysis Plotting Method

Provided for illustrative purposes only.

5 Ongoing Monitoring/Adjusting

Morningstar monitors and makes adjustments when:

- Market condition shifts
- Better valuation opportunities present

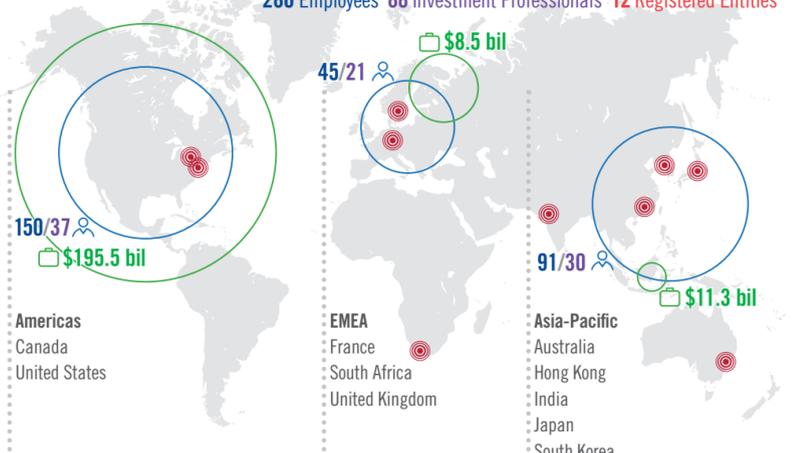

Morningstar's Analyst Rating for Funds and Institutional Investment Software
